

HR-POL-505: Performance Evaluation & Incentive Eligibility

5.1 Performance Rating Cycles

Performance Ratings are assigned on a 1–5 scale during biannual review cycles and are used as inputs for:

- Bonuses and incentives,
- Promotions and role expansions,
- Internal transfers (refer HR-POL-202).

Ratings are considered ****valid**** only if the employee has completed at least ****85% of assigned tasks**** during the evaluation window.

5.2 Incentive Eligibility Conditions

An employee is eligible for performance-based incentives only if:

- Performance Rating $\geq$ ****3.5/5****, ****and****
- No active disciplinary action exists, ****and****
- Departmental Task Completion Score (TCS) $\geq$ ****70%**** for the same period.

5.3 Conflict Clause: Incentive Suppression

If an employee's ****individual Performance Rating exceeds 4.5/5**** but the ****departmental TCS is below 60%****,

the incentive payout is ****deferred****, not denied, and may be re-evaluated in the next cycle.

> This creates a distinction between ***individual excellence*** and ***collective delivery***.

HR-POL-606: Remote Work & Attendance Logic

6.1 Remote Work Eligibility

Employees may opt for remote work up to ****2 days per week****, provided:

- Their role is classified as “Remote-Eligible”,
- Weekly Screen Time meets or exceeds the departmental median,
- No unresolved IT compliance issues exist.

6.2 Attendance Integrity Rule

Remote work requests are automatically rejected if:

- The employee has logged ****more than 2 late check-ins**** in the past 14 days, ****or****
- Average daily active hours have fallen below ****6 hours****.

6.3 Overlap Constraint with Leave Policy

> Remote work ****cannot**** be used as a substitute for leave.

If an employee applies for remote work during a period when:

- Their leave request was denied under ****HR-POL-101 (Conflict Rule)****,
- the remote work request is also ****auto-rejected**** unless approved by HR Operations.

HR-POL-707: Training, Certifications & Skill Credits

7.1 Mandatory Training Requirements

Employees must complete all assigned mandatory training modules within defined timelines to remain:

- Promotion-eligible,
- Transfer-eligible,
- Incentive-eligible.

Failure to comply places the employee in a **“Skill Deficit” state**.

7.2 Skill Credit Accumulation

Skill Credits are awarded for:

- Completing optional training,
- Earning internal certifications,
- Successfully closing cross-functional initiatives.

Skill Credits are non-transferable and expire after **24 months**.

7.3 Conflict Interaction: Special Project Certification

While **Special Project certification** (see HR-POL-202) enables fast-tracked transfers:

- It **does not negate** mandatory training obligations.
- Employees in a Skill Deficit state **cannot activate** Special Project privileges.

HR-POL-808: Disciplinary Actions & Behavioral Flags

8.1 Behavioral Flag System

Behavioral Flags are automatically raised for:

- Repeated missed deadlines,
- Unapproved absences,
- Policy misuse (e.g., mislabeling meetings as emergencies).

Flags are categorized as:

- Minor,
- Major,
- Critical.

8.2 Impact of Flags on HR Processes

Flag Level	Impact
-----	-----
Minor	Warning only
Major	Blocks transfers and incentives
Critical	Blocks leave, remote work, and hardware requests

8.3 Temporal Decay Rule

Behavioral Flags decay over time:

- Minor: 30 days
- Major: 90 days
- Critical: 180 days

> However, ****new violations reset the decay timer****, even if the new violation is of a lower category.

HR-POL-909: Emergency Classification & Override Governance

9.1 Emergency Levels

Emergencies are classified as:

- Level 1: Immediate organizational risk
- Level 2: Significant disruption, non-immediate
- Level 3: Localized or manageable impact

Only **Level 1 Emergencies** may override:

- Meeting scheduling restrictions (HR-POL-404),
 - Leave denials (HR-POL-101),
- but **never** disciplinary blocks (HR-POL-808).

9.2 Audit & Retrospective Review

All emergency overrides are:

- Logged automatically,
- Reviewed monthly by HR Governance,
- Subject to downgrade if misuse is detected.

Misuse impacts future override eligibility at both **employee and manager** levels.

System-Wide Resolution Principle

When two or more policies conflict:

1. **Critical restrictions override permissive rules**
2. **Organizational metrics override individual metrics**

3. ****Executive approvals override system blocks****, except where explicitly prohibited

This hierarchy must be enforced consistently across all automated decision agents.
