

HR-POL-1010: Promotion & Role Expansion Policy

10.1 Promotion Eligibility Criteria

An employee may be considered for promotion or role expansion only if:

- Minimum **24 months** in the current role,
- Performance Rating $\geq$ **4/5** for the last **two consecutive cycles**,
- No active Behavioral Flags (see HR-POL-808),
- Completion of all mandatory training modules (see HR-POL-707).

10.2 Capacity Availability Rule

Promotion approval is subject to:

- Availability of headcount in the target band,
- Budgetary clearance from Finance.

> Meeting all eligibility criteria does not guarantee promotion.

10.3 Overlap with Transfer & Leave Policies

If an employee:

- Has an **approved internal transfer** (HR-POL-202), **or**
- Has taken **more than 10 working days of leave** in the last 90 days,

Then promotion consideration is **deferred** to the next cycle.

HR-POL-1111: Overtime, Workload & Burnout Safeguards

11.1 Overtime Classification

Overtime is classified as:

- **Approved Overtime** – pre-authorized by manager,
- **Unapproved Overtime** – logged without prior approval.

Only Approved Overtime contributes to workload assessment.

11.2 Burnout Risk Detection

An employee is flagged as **“Burnout Risk”** if:

- Average weekly hours exceed **55 hours** for 3 consecutive weeks, **and**
- Screen Time variance exceeds $\pm 20\%$.

11.3 Conflict Clause: Burnout vs Performance

If an employee is flagged as Burnout Risk:

- Performance Rating calculations are **temporarily frozen**,
- Incentive eligibility (HR-POL-505) is **paused**,
- Leave requests **may be auto-approved**, *unless blocked by HR-POL-101 departmental conflict rules*.

HR-POL-1212: Data Access & Confidentiality Controls

12.1 Access Tiering

Employees are assigned data access tiers:

- Tier 1: Public internal data,
- Tier 2: Department-confidential,
- Tier 3: Organization-critical.

Tier upgrades require:

- Manager approval,
- Information Security validation,
- No Critical Behavioral Flags in the last 180 days.

12.2 Access Revocation Logic

Access is automatically downgraded if:

- Screen Time drops by more than ****40% over 14 days****, ****or****
- An employee enters a Performance Improvement Plan (PIP).

12.3 Cross-Impact Rule

Employees with downgraded access:

- Cannot lead Special Projects,
- Cannot invoke emergency overrides (HR-POL-909),
- May have transfer requests ****paused****, not denied.

HR-POL-1313: Workforce Planning & Redundancy Safeguards

13.1 Workforce Optimization Reviews

Departments undergo quarterly workforce optimization reviews based on:

- Cost-to-output ratio,
- Average Task Completion Score,
- Skill redundancy index.

13.2 Redundancy Risk Flag

An employee is flagged as **“Redundancy Risk”** if:

- Their role overlaps $\geq 60\%$ with another role, **and**
- Their Skill Credits are below the departmental median.

13.3 Protection Clause

Employees flagged as Redundancy Risk:

- Are **ineligible for promotions**,
- May still request training (HR-POL-707),
- Cannot be transferred unless approved by both HR Governance and the CEO.

HR-POL-1414: Exit, Notice Period & Knowledge Transfer

14.1 Notice Period Requirements

Standard notice periods:

- Individual Contributor: **30 days**
- Managerial Roles: **60 days**

14.2 Knowledge Transfer Completion Rule

Resignations are considered ****incomplete**** unless:

- All assigned documentation is submitted,
- A minimum ****Knowledge Transfer Score of 80%**** is achieved.

14.3 Conflict Clause: Pending HR Actions

If an employee has:

- A pending promotion,
- A pending transfer,
- Or an unresolved disciplinary case,

Then resignation processing is ****paused**** until:

- The HR action is resolved, ****or****
- Executive HR issues a closure directive.

HR-POL-1515: AI System Usage & Decision Accountability

15.1 AI-Assisted Decision Boundaries

AI systems may:

- Recommend HR actions,
- Flag conflicts,
- Enforce policy precedence.

AI systems may ****not****:

- Create new exceptions,

- Override CEO-level approvals,
- Modify policy thresholds.

15.2 Human-in-the-Loop Requirement

Any AI-generated decision that:

- Denies leave,
- Blocks transfers,
- Triggers disciplinary action,

Must be **auditable** and **explainable** to HR Operations.

15.3 Recursive Dependency Warning

If an AI decision relies on:

- Metrics influenced by previous AI decisions (e.g., Screen Time, Task Completion),

Then the system must:

- Log the dependency,
- Avoid circular enforcement within the same evaluation window.

Meta-Policy: Precedence & Temporal Resolution

When resolving conflicts:

1. **Safety, Compliance, and Confidentiality override performance**
2. **Temporal rules override static rules** (latest valid state applies)
3. **Paused states override eligible states**

4. ****Deferred ≠ Denied****

Agents must track:

- State transitions,
- Time windows,
- Approval authority depth.
