

HR-POL-1616: Performance Improvement Plan (PIP) Governance

16.1 PIP Trigger Conditions

An employee is placed on a Performance Improvement Plan if:

- Performance Rating $\leq$ **2.5/5**, **or**
- Task Completion Score $<$ **55%** for 2 consecutive review windows.

PIP duration is **60 days** unless extended.

16.2 Restrictions During PIP

While on PIP, the employee:

- Cannot apply for internal transfers (HR-POL-202),
- Cannot receive incentives (HR-POL-505),
- Cannot initiate hardware upgrade requests (HR-POL-303),
- May apply for leave **only if** departmental TCS $\geq$ **70%** (stricter than HR-POL-101).

16.3 Exit Criteria & Carry-Forward Effects

Upon successful completion of PIP:

- Restrictions are lifted,
- A **PIP Recovery Flag** remains active for **90 days**.

> During the Recovery period, performance metrics are weighted at **0.8x** for promotion and transfer evaluations.

HR-POL-1717: Cross-Department Collaboration & Load Sharing

17.1 Temporary Assignment Rules

Employees may be temporarily assigned to another department for:

- Cross-functional initiatives,
- Emergency workload balancing,
- Special Projects.

Assignments may last up to **90 days**.

17.2 Dual-Department Metric Resolution

During temporary assignments:

- The employee's **primary department** retains ownership of leave approvals,
- The **host department's TCS** influences task scoring.

17.3 Conflict Clause: Metric Dilution

If the host department's TCS < **60%**:

- The employee's individual Task Completion Score is capped at **85%**, even if actual performance exceeds this value.

HR-POL-1818: Bonus Pools & Collective Performance Weighting

18.1 Bonus Pool Formation

Bonus pools are allocated at the department level based on:

- Revenue contribution,
- Average Performance Rating,
- Average Task Completion Score.

18.2 Individual Bonus Adjustment

Individual bonuses are adjusted by:

- Personal Performance Rating,
- Attendance consistency,
- Behavioral Flag status.

18.3 Conflict Clause: High Performer Suppression

If:

- Departmental TCS < **60%**, **and**
- Bonus Pool utilization exceeds **90%**,

Then **all individual bonuses are capped**, regardless of personal ratings.

HR-POL-1919: Attendance Anomalies & Integrity Checks

19.1 Anomaly Detection

Attendance is flagged anomalous if:

- Screen Time spikes > **40% week-over-week**, **and**
- Task Completion does not increase proportionally.

19.2 Impact of Anomalies

Employees with unresolved anomalies:

- Are excluded from incentive calculations,
- Cannot invoke emergency exceptions (HR-POL-909),
- Are subject to retroactive audit.

19.3 False Positive Safeguard

If anomaly explanation is approved by HR Analytics:

- Penalties are reversed,
- However, historical metrics remain unchanged for decision traceability.

HR-POL-2020: Delegation, Proxy Authority & Escalation

20.1 Proxy Authority Activation

Managers may delegate approval authority during absence, but:

- Proxy authority expires automatically after ****14 days****,
- Proxy cannot approve exceptions involving themselves.

20.2 Escalation Thresholds

If an approval request:

- Is pending for more than ****5 working days****,
- it is auto-escalated to the next authority level.

20.3 Conflict Clause: Delegation vs Emergency

Emergency overrides (HR-POL-909) ****cannot**** be exercised by proxies, even if the original authority is unavailable.

HR-POL-2121: Knowledge Contribution & Internal Reputation Index

21.1 Knowledge Contribution Score (KCS)

Employees accumulate KCS through:

- Documentation,
- Mentoring,
- Internal talks,
- Code or process reuse.

21.2 Reputation-Based Privileges

High KCS (top 15%):

- Reduces approval latency for transfers and training,
- Improves priority for hardware allocation.

21.3 Limitation Clause

KCS:

- Does ****not**** override disciplinary blocks,
- Does ****not**** bypass departmental performance constraints,

- Decays by ****10% annually**** without new contributions.

HR-POL-2222: Workforce AI Monitoring & Fairness Constraints

22.1 AI Monitoring Scope

AI systems may monitor:

- Task velocity,
- Collaboration graphs,
- Work pattern stability.

They may not infer:

- Intent,
- Motivation,
- Personal circumstances.

22.2 Bias Mitigation Rule

If an AI decision disproportionately impacts:

- A single department, ****or****
- A single role type,

The decision must be:

- Flagged for fairness review,
- Temporarily suspended if variance > ****25%****.

22.3 Feedback Loop Guardrail

AI systems must not:

- Retrain on outcomes they directly influenced within the same quarter.

HR-POL-2323: Policy Evolution & Version Drift

23.1 Policy Versioning

Each policy revision:

- Has a unique version ID,
- Applies prospectively, not retroactively.

23.2 Transitional Conflicts

If two policy versions overlap:

- The version active ****at the time of request initiation**** applies.

23.3 Sunset Rule

Deprecated policies:

- Remain auditable,
- Cannot be referenced for new decisions.

Global Reasoning Constraint (GR-01)

Automated agents must:

- Track **policy versions**, **time windows**, **flags**, and **approval authority**,
- Resolve **paused vs deferred vs denied** states correctly,
- Produce a **decision trace** explaining *why* an action failed even if it appears eligible.

Failure to generate a traceable rationale is considered a **system-level policy violation**.
